Course Title : Maintenance of Laboratory Equipments

Duration of the Course: 3 Months

Year: 2022-2023

Syllabus:

Maintenance of Laboratory Equipments

Introduction of current, voltage, resistors, capacitors, inductors. Series and Parallel connections resistors and capacitors. Uses of analog meters and Multimeter. Active and Passive components. AC sources (transformer dimmerstat), oscillators, DC sources (rectifiers, battery), AC and DC motors, fuse box, Checking the health of resistance box and rheostat, repair of extension box. Checking the health of capacitors and diodes. Soldering and de-soldering the wire. Maintenance of adaptors. Maintenance of decorative lamps and lights. Basics of wiring (phase, neutral) types of electrical wire, basics of home wiring.

Checking the health of travelling microscope, calibration of travelling microscope. Calibration of spectrometer.

Practical:

1. Measurement of different physical quantities like resistance, voltage current using analog and digital multimeter
2. Checking the health of the resistance and rheostat
Calibration of uncalibrated instruments

3. Checking the health of the diodes (Normal diode, Zener diode, photo diode, and LED's)
4. Checking the health of capacitors and inductors
5. Testing passive and active components using multimeter
6. Soldering and de soldering of components
7. Checking of the phase in AC supply (mains)
8. Study of Battery (Power supply)
9. Checking the telescope and its calibration
10. Checking the spectrometers alignment, focusing of collimator and telescope.

Maintenance of Laboratory Equipments

Course conducted from 06-11-2022 to 05-01-2023

Course Outcomes:

- Able to use analog and digital meters and multimeters to measure currents voltages resistance, capacitance
- Able to know different types of rheostats, their power ratings and their applications
- Realize the importance of power rating of passive and active components
- Develop the skill of soldering and desoldering techniques
- Understand AC sources and DC sources.
- Able to identify Live, neutral and earth in the electrical appliances
- Able to identify the problems in telescope and are able to repair it by themselves
- Calibration of spectrometer
- Able to identify the problems in spectrometer and are able to repair it by themselves

The add-on course on "**Maintenance of Laboratory Equipments**" was conducted for B.Sc. I semester students in the department of Physics from 06-11-2022 to 05-01-2023. Totally 30 students enrolled for the course. The classes and practical were conducted for 6 weeks (12 hours theory and 26 hours practical). The performance of the students was assessed based on the demonstration and viva at the end of the course. The certificates were issued to all the successful students.
