2.2.1 - The institution assesses the learning levels of the students and organizes special Programs for advanced learners and slow learners

By employing student-centric approaches, Karnataka Science College, Dharwad assists, announces, and disseminates knowledge among its students. Bridge courses are compulsorily conducted in respective subjects at the beginning of every semester to ensure their understanding of key concepts. Advanced learners are identified through their multifaceted performance, and they are encouraged to take part in additional curricula. Slow learners are identified based on their performance in internal tests. Students who were ill and unable to represent the college in various events or attend exams were provided with another opportunity to participate.

Slow learners

Tutorial classes are mandatory and are included in the college schedule. These are remedial courses designed to assist slow learners in overcoming their exam anxiety. Following every exam and assignment, teachers directly address any problems or challenges that students have encountered. Slow learners are encouraged to participate in topic-related talks, seminars, and interactive sessions for participative learning. Teachers assist students who learn slowly by paying careful attention to their performance. Every teacher uses the WhatsApp or Telegram app to communicate with their students and works tirelessly to help slower learners improve. Additionally, they are provided with additional study material and topic-related notes.

Advanced learners

Our college evaluates the learning levels of the students and encourages advanced learners by providing them access to reference books and research-focused studies via e-links or research gateways. Students are also encouraged to attend and participate in intercollegiate events, small research projects, workshops, and conferences at the regional and national levels, showcasing their poster presentations and short project works associated with their area of study. Additionally, counseling for students is conducted for both advanced and slow learners.

List of Bridge Courses conducted by Various Departments:

Sl. no	Bridge Course	Course/ Semester
1	Bridge Courses: MicroBiology	B. Sc I & II Semester DSCC
2		B. Sc III & IV Semester CBCS
3		B. Sc V & VI Semester -CBCS
4	Bridge Courses: Zoology	B. Sc I & II Semester DSCC

Date. 15/5/2023 BSc Sem MONDAY + 2003
2022 BRIDGE COURSE

The students who have missed previous bridge course (on 3/5/2023) are made into different groups, and basic explanation (what is explained to other batches on wednesday 3/5/2023) is made. Here the students are realized the difference between moving coil galvanometer & ballistic galvanometer. Basic connection & setting lamp and scale is showed, and also allowed to measure time period of B.G. which they know the procedure to measure time period from 1 semester.

BRIDGE - COURSE
B.Sc. IV SEM 2022-23

Students are introduced to R.Sc. IV sem lab. Here in students are presented with ppt showing capacitor, resistor's value identification. They are allowed to make basic connections.

Date: 3/5/2023 BRIDGE COURSE
 Day: Wednesday 2022-2023
 B.Sc. II Semester

The students are summarized with basic connections which they know in the P.V.C. Different types of plug keys are showed and corresponding electrical connections are made. Since students know about the moving coil galvanometer in their previous class, a comparison of that with ballistic galvanometer is showed. The difference between moving coil galvanometer & B.G. is realized to students & basic setting of B.G. with lamp & scale arrangement is showed. All students are introduced to basic electrical connections of experiment. Students are made to find time period of B.G. as they know how to calculate time period from their previous semester.
