

7.2.1 - Describe two best practices successfully implemented by the Institution as per NAAC format provided in the Manual.

Karnatak Science College has incorporated many best practices. Among them, the popular best practices are listed here.

I. Best Practice

1. Title of the Practice: Students Mentoring System

2. Objectives: Karnatak Science College has a well planned “students mentoring system”, which is being implemented meticulously for each class, across different programs. For regularly monitoring the progress of students, all the students belonging to different semesters and with different subjects were divided among the teachers (who are engaging either theory or practical classes for them) right at the beginning of the academic year. The mentoring system is employed to enable students to succeed both in college life and in their career.

- i. Mentees will be counselled by the Mentor to understand their strengths and weaknesses, and they will be guided to set realistic academic goals.
- ii. For the overall development of the mentees, each will be motivated to take an active part in co-curricular activities, like for example, taking part in cultural, sports, indoor and outdoor games.
- iii. Attend to the distress calls and the issues faced by the students in class, with regard to their academic, social, and emotional problems.
- iv. To undertake academic counselling and career counselling tasks.

3. Context: The challenges and issues faced in the mentoring system are:

- i. Since there are more than one hundred students in each class, attending to the grievances of each (individual) student’s academic and administrative needs and addressing them is a difficult task.
- ii. Identification of a sincere and hardworking leader or monitor, who can give the collective review of all the mentees in the class to the mentor.
- iii. Inspiring students to participate in the activities organized by various forums in the college, namely, Science Association, Study circles, seminars/workshops/training programmes, awareness programmes, NCC and NSS, among many others.
- iv. Identifying academically weak students and arranging for special classes and remedial classes.
- v. The mentor also needs to provide sufficient intellectual stimuli and proper guidance to the advanced learners in the class.
- vi. Coordinating with the parents/guardian of the students is an important aspect of mentoring, as it is difficult to get in personal touch with outstation parents/guardians.
- vii. Providing guidance to emotionally and psychologically distressed students is a great challenge, requiring the assistance of professionals, like psychiatrists, for example.

4. The Practice: The mentoring system, which has been practiced in this college for the last several years, is instrumental in responding effectively to the various needs of students at the grass root level. This is one of the important core component practiced in the institution.

- i. At the end of each academic year, mentor teacher submit a brief annual report indicating the strengths and weaknesses of the mentee students.
- ii. Each mentor is provided with all the details of the mentee students required for further monitoring.

- iii. The mentor arranges for parents' meetings once in each term in coordination with the Student Welfare Officer of the college to discuss about their wards performance, status of attendance and the academic programs of the college.
- iv. The mentors nurture and guide the students regarding any issues that may have confronted them.
- v. The mentor implements programs for separate intervention for the academically weak students and the advanced learners in their respective class.
- vi. They provided guidance and counselling to the students regarding personal and academic issues.
- vii. Academic counselling and career counselling tasks were performed by the mentors, particularly for students aspiring for higher studies.
- viii. The mentor guides students both in co-curricular and extra-curricular activities, by motivating them to become members of various forums and by encouraging them to participate in fests organized by the college and elsewhere.

5. **Evidences of Success:** The mentoring program in college has expanded rapidly to emerge as a significant feature in its functioning. As a result of mentoring, the following positive developments have taken place.

- i. Few mentors of the final year classes have taken up activities with mentees of their respective classes that has enhanced the employability skills of these students. This is evidenced by an increased number of students who have progressed towards higher education and placement.
- ii. Many final year students were motivated by their mentors, and they voluntarily came forward to shoulder responsibility as student secretaries of various departments in the college Gymkhana. Their work has resulted in many students bagging prizes in different competitions as well as recognition as "Karnatak University Blues".
- iii. Advanced learners were provided with reference material for theory and practical classes, as a result of which most of these students have scored well in the Semester - end examinations and they have obtained University ranks.

6. **Problems Encountered and Resources Required:** The college understands and acknowledges the need for effective mentoring, as it results in better outcomes for the students.

- i. As a majority of the students who have been admitted to this college are from rural background, exploring their hidden talents and motivating them is a challenging task, and the mentor has to strive hard to take these students to confidence and spend more time with them.
- ii. Each class consists of more than one hundred students, the number of students assigned to each mentor is quite large, and therefore, it becomes difficult for the mentor to concentrate on each student's progression. Hence, more manpower is required.
- iii. To develop the placement skills among the mentees, programmes for skill enhancement needs to be conducted by inviting prospective employers or external agencies, and the college is forced to meet out the expenses from its internal resources.

II. Best Practices

1. **Title of the Practice: Solid waste management and creating eco-friendly Green campus**

2. **Objectives:** Karnatak Science College has a wide spread green campus, with fifty four acres, having good green cover. To maintain cleanliness in the campus, it has adopted a best practice called “**Solid waste management and creating eco-friendly campus**”.
 - i. To meet out the requirements of a **green** and **cleancampus**, waste generating places have been identified; in fact, some measures have been designed and implemented in order to maintain cleanliness in the college campus.
 - ii. Dustbins have been provided to segregate wet and dry solid waste at the identified locations in the campus.
 - iii. Dry waste is emptied in collaboration with the city municipal corporation, and the wet waste is used for composting.
 - iv. The compost generated is used in the botanical garden of the college.
 - v. Awareness has been created among the students about the impact of cleanliness on health and well-being of individuals present in the campus.
 - vi. Waste management is achieved in a non-polluting and responsible manner.
 - vii. All the departments in the campus are responsible to maintain greenery, by way of plantation drives and also by nurturing the existing plants in the campus.
 - viii. Establishment of renewable energy sources like roof-top solar power plants in the campus is being attempted.
 - ix. Campus green auditing and carbon sequestration has been taken up.
 - x. Collection and proper maintenance of e-waste are done.

3. **The Context:**
 - i. Since our college campus is very large, with around one thousand and five hundred students studying in various departments existing here, the generation of solid waste is natural. Hence, it is essential to develop protocols and healthy practices to ensure a pollution free campus.
 - ii. In fact, light weight dry waste is subjected to disperse in the campus due to strong winds, thereby creating an unhealthy environment. Therefore, the light weight dry waste needs to be collected, before its proper disposal by scientific segregation and disposal methodologies.
 - iii. To reduce energy dependency by using renewable resources.
 - iv. To conserve and enrich the ground water by adopting rain water harvesting strategies.
 - v. To recycle wet waste, by converting it into a compost, and later using it as manure in the garden present within the campus.

4. **The Practices:** Solid waste management and creating a eco-friendly campus is a healthy practice in our college campus. Hence, the campus is green and clean, thereby attracting a large number of members of the public, who enjoy exercising in the campus, breathing the fresh air.
 - i. Waste generating locations like cafeteria, students home, laboratories, vehicle parking slots, hostels, bank, health centre, among many other locations have been identified and dustbins are installed for the collection of waste. In fact, the collected waste is segregated at the place of collection itself. Dry solid waste is emptied by the municipal corporation, whereas the wet waste is dumped in pits for composting, and the compost is used for the garden. The e-waste is emptied by the personnel identified by Karnatak University, Dharwad.
 - ii. **Harnessing Solar Energy:**
 - a. Installed capacity in hostels: 6 units of 500 litre each capacity (Equivalent to 120 electric geysers of 25 litre capacity each)
 - b. One Solar panel to recharge UPS system of 2kVA capacity.

- c. Eleven Solar Street Lights are provided in the campus
- iii. **Rain water harvesting:** Each department harvesting rain water to reduce the water requirement and use it for various purposes, particularly in the laboratories and for gardens. There are four rainwater harvesting pits with the Standard plot area 200 Sqmt, required volume of 4.0 Cumt rain water harvesting pit with the dimension of 2.0 mtrs are provided in the campus.
5. **Evidences of Success:** The practice of **Solid waste management and creating eco-friendly Green campus** has made a significant impact, by creating a pollution free campus. Some of the evidences are listed, as follows.
- i. This process has created a plastic free and green campus which has supported the teaching and learning process by creating a suitable environment.
 - ii. The process of Carbon sequestration reveals the reduction of carbon dioxide concentration in the atmosphere of the campus.
 - iii. Harnessed Solar energy has reduced our dependency on non-renewable energy sources like electricity. This facility has benefited nearly 700 girl students in the hostel.
 - iv. 2 kVA Solar energy recharging UPS has been installed, and it can be used for four hours, uninterruptedly.
 - v. Harvested rain water has enriched the ground water situation and the excess amount of water is used for gardening.
6. **Problems Encountered and Resources Required:**
- i. **Problems encountered: NIL**
 - ii. **Resources Required:** The college meets out the expenses incurred for this activity from its internal resources

Principal,
Karnatak Science College
Dharwad.

MENTOR'S REPORT

For the academic year 2020-21, 21 students were allotted. I as a mentor enjoyed working and mentoring the students as they were in practical (most of them). The students interacted with me in the practicals as well as when they faced an issue, regarding books or health issues. I was able to address these issues to the best of my ability. Since most of the year was spent on online classes, yet students were in touch. All students are regular to the class and practicals. Dr. Pragnan R. Gangan was a regular participant to him, advising him about the future and the importance of being regular. I changed him. Apart from this, all students are well behaved, regular and they have performed well in their annual exam. All students did take care during the covid period following the SOP.

Asim M. Singh

(Mentor should provide brief summary of mentorship): Many student related grievances are being raised. By listening the grievances many students improved in their attitude, health, way of presentation attending the classes, solving the doubts, attempting the lab/practicals, trying to succeed in their studies.
